Regarding: 25-133 Delete, Delete, Delete

My name is Thomas L Sams, FCC call sign, K0TLS. I'm writing to encourage the FCC to continue the licensing requirements for amateur Ham Radio operation and to continue the current frequency allocations for amateur radio use.

Amateur radio has a rich and long history of providing emergency communication services and experimentation leading to new innovations in communication. Deleting frequency allocations, reducing frequency allocations, terminating licensing requirements will certainly negatively impact 750,000 Ham Radio Operators who have worked hard to pass FCC license requirements and are always ready to assist with emergency communications during catastrophic events.

Thank you,

Thomas L Sams, K0TLS
